Red Color Book

by dl

Introduction

This book, The Red Color Book, is a comprehensive guide to understanding and exploring the diverse shades of the color red. It dives deep into the visual and emotional aspects of red, presenting meticulously curated color swatches with their corresponding HEX, RGB, CMYK, and HSL values. Perfect for designers, artists and color enthusiasts, this book offers a valuable resource for creating impactful and cohesive designs. By focusing on red, one of the most dynamic and evocative colors, the book celebrates its versatility across art, design and branding.

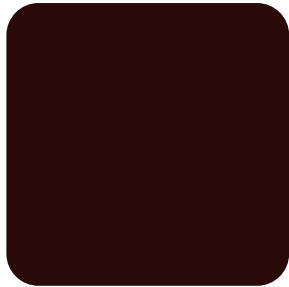

About the Author

Udayalingam, the creative mind behind The Red Color Book, is a passionate designer and color theorist with a keen eye for detail. With years of experience in graphic design and an innate love for color exploration, Udayalingam has dedicated their career to helping creatives harness the power of colors in their work. Through this book, Udayalingam aims to inspire designers to push the boundaries of their creativity and explore the endless possibilities that colors, especially red, bring to life.

Red

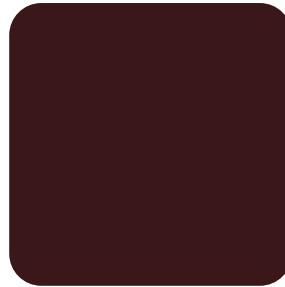

Red is a primary color that corresponds to the longest wavelength of light that can be perceived by humans.

- Energy and Passion
- Warning and Danger
- Courage and Strength
- Cultural Significance
- Warmth and Vitality
- Psychological Impact
